

In this month's Hydrafile:**Featured Product Range**

Hyspecs has secured exclusive New Zealand rights to the Kar-Tech range of wireless remote control systems. Specifically designed to operate hydraulic machinery the Kar-Tech remote control systems compliment our extensive range of hydraulic equipment.

Kar-Tech (USA) specialise in cost effective custom design & manufacture of advanced control systems for mobile electro-hydraulic equipment. Due to the nature of New Zealand's market and the often one-off projects we specialise in, Kar-Tech remote controls are an ideal solution. Working closely with you and Kar-Tech we can fully customise and build a solution in a timely fashion.

One of the great features of the product is the ability to program specific functions and how they behave via a Palm Pilot or Laptop computer. For example a customer who purchased one of Kar-Tech's remote systems found that after a couple of days use they needed some changes to really get it perfect. We talked with Kar-Tech in the USA and within half an hour we had a new program emailed back to us which we in turn forwarded to the customer. They had a Palm Pilot PC so uploaded the new program and viola, the machine was working perfectly within an hour of calling us. This sort of service is something we think will be unique to the market.

To view the full range of Kar-Tech remote control systems available please visit our [website](#) or go directly to the [Kar-Tech website](#).

Talk with one of our sales engineers today or [email us](#) your remote control requirements using the contact details in the left hand column.

**Company News**

We've been busy branding Sister company Hyspecs Transmissions Limited (HYTRANS). Keep an eye out for our Suzuki Vitara decked out in the new company livery.

To see what HYTRANS can offer you in the way of mechanical power transmission solutions, visit our website by [clicking here](#). Talk with Brent Cleland our National Product Manager today on 029 200 4823 or email him directly brentc@hytrans.co.nz.

Staff News

Hyspecs is pleased to welcome aboard Craig Kemp. Craig fills a new role, Project Engineer and will be specialising in Industrial hydraulic applications.

Craig holds a National Diploma in Mechanical Engineering and started his career working for Hyflo Southern Africa (South Africa's second largest Hydraulic & Pneumatic distributor) in 1995, progressing to Project Manager.

Craig left Hyflo and South Africa in 2003 and made the move to New Zealand where he worked for Eaton Fluid Power in Auckland from 2004 to 2006 starting as Project Engineer and then OEM Sales Manager. He designed and commissioned hydraulic systems mainly in the mining, marine and industrial automation sectors. As Project Manager he was also responsible for the projects team, workshop service department and manifold manufacturing division. With a total of 11 years experience in the hydraulics sector Craig will fit in well at Hyspecs.

To talk with Craig he can be contacted using the Auckland number or phone him directly on 029 220 1000, or alternatively drop him an email: craig@hyspecs.co.nz.

Kind regards

Nick Cottier
Marketing & IT Manager
