

**In this month's Hydrafile:****New Product - Scoobi by Hyspecs**

So what's a Scoobi? The acronym Scoobi was coined by one of our service engineers a few years back and stands for "Self Contained Old Oil Beautifying Implement".

The Scoobi was designed to transfer oil from one vessel to another, whilst extracting contamination from the oil in the process. Typically used for transferring old oil from a tank that needs cleaning, during system maintenance and for filling tanks in new systems. Even new oil contains contaminants so it is recommended that a new drum of oil be filtered before going into the tank. The Scoobi provides a clean and easy way of doing this.

[Download the Scoobi product sheet here.](#)

**Key features and benefits of the Scoobi:**

- \* Dual filtration in and out, 10 micron, useful for separate water and particle filtration ensuring ultra clean oil
- \* Gauge for indication that filter needs changing
- \* Pneumatic tyres and easy handgrip for manoeuvrability and transportation
- \* IP65 rated on/off switch
- \* Assembled from locally sourced components for ease of service
- \* Manufactured by Hyspecs

**Specifications:**

- \* Transfer oil at 20 l/min
- \* Powered by a single phase 0.75kW electric motor with lead and plug
- \* Oil is pumped via a Galtech gear pump

List price for the Scoobi is \$2985 + GST. Hyspecs currently has two of these units in stock. Lead time from ordering if not in stock is typically 5 working days. We also hire out our workshop Scoobi at the rate of \$50 per half day and \$100 per day plus filters.

For more information, or if you wish to purchase or hire one of these units please give us a call or email us at [hydrafile@hyspecs.co.nz](mailto:hydrafile@hyspecs.co.nz)

## Hydraulic Seminar Auckland

Hyspecs Auckland will be holding their annual Stage One Hydraulic Seminar on November the 1st and 2nd this year. Download the registration form [here](#).

This two-day seminar offers you an introduction into hydraulic components and their operation. Subject matter covers generic types of pumps, motors and valves and the course content will provide you with an understanding on how these components operate, are applied and conditions that may lead them to fail.

The information presented in the seminar is combined and used in a winch circuit design that is carried out with parameters provided by participants. This allows you to see an example of basic circuit design and component combinations.

Basic faultfinding is also covered to assist you with the emotions of lost money, time and production involved with on-site problem solving. Looking at problem solving from another angle can help you reduce your customer's downtime.

All topics are presented in an open forum and we welcome you to ask questions and participate in topic discussions. This provides the opportunity to hear and share real life experiences that relate to the topic being discussed. For more information on the course content download the [Programme from here](#).

The cost of the two day course is \$475 + GST and this includes all course material, lunch and refreshments for both days.

To register for the course please download the form [here](#). Print this off and fax/post back to us as soon as possible. Alternatively just give us a call or email us at [hydrafile@hyspecs.co.nz](mailto:hydrafile@hyspecs.co.nz). Attendee numbers are limited so places are allocated on a first come first serve basis.

## Staff News

Hyspecs Christchurch welcomes aboard two new sales engineers, Geoff Cooke and Brad Whitaker.

Geoff has a wide range of skills in sales, management and engineering. He brings to Hyspecs over 20 years experience and is well suited to the Hyspecs sales team. Geoff will be covering the following areas; Christchurch North, Blenheim, North Canterbury, Ashburton and Timaru.

Brad comes from an industrial electrical sales background and is a fully qualified electrician. With electrics and hydraulics being very similar, Brad is looking forward to the challenge in the change of career. Brad will be covering the following areas; Christchurch South, West Coast, Otago and Southland.
