

**In this month's Hydrafile:****Products of interest:**

**Donaldson FISBA - FSK suction filters** make easy work of suction filter element change outs. The FISBA - FSK suction filter mounts directly onto the side of the oil reservoir and provides an SAE split flange type port to connect to the hydraulic pump. During routine maintenance the element can be isolated, removed and replaced without the need of draining the reservoir. This is achieved by manually closing the inlet port via a screw valve located externally of the power pack. Once closed off the element can be removed with minimal fluid loss and mess.

Stocked filters feature:

- 2 frame sizes - 120 lpm and 300 lpm
- 10 bar operating pressure
- 90 micron wire mesh (other media types available on request)

Click on the following green link to open a PDF data sheet on both stocked sizes of the Donaldson FISBA - FSK suction filters - [FISBA - FSK Data Sheet - \(235KB\)](#)

Request a Donaldson CD Catalogue from me today. All you have to do is click on the following blue link, and provide your name and delivery address details. I will reply with a confirmation of your CD's dispatch. For more additional information on the Donaldson FISBA - FSK including pricing and availability, contact Hyspecs by clicking [Hyspecs Information](#).

**Featured Product Range:**

**Hyspecs custom power packs made to suit your specific requirements.** In conjunction with the vast stock range of hydraulic components, reservoirs and electric motors, Hyspecs can assemble and test hydraulic power packs ready for on-site installation. Our fully equipped workshops offer a high level of flexibility providing almost limitless combination and configuration options.

Talk with our Sales Engineers today with regards to your power pack requirements. Call Hyspecs or click the following blue link to send us an email. - [Hyspecs Information](#)

Check out the standard range of Hyspecs reservoirs. These are used as the basis of our custom power packs but are available as shown. Just click on the following green link to open the PDF file - [Standard Reservoirs - \(170KB\)](#)

### **Subscriber feedback:**

**Be in to win a pair of Hyspecs Wiltshire Bar-B-Mate Supertongs ...** That's right, there's nothing like having the right tools for your mid winter BBQ. All you have to do is send me an email by clicking on the following blue link. Just drop me a few lines letting me know your thoughts about the Hyspecs Hydrafile - What's good, what's not. What's needed, what's not. I'll put the names into a hat and draw it out in time for the next Hydrafile edition. I look forward to hearing from you.

Contacting us is easy:

1. Click anywhere you see [Hyspecs Information](#) and your email program will open ready to go.
2. Call one of our Sales Engineers on the numbers listed above
3. Click on our website address listed above and go to our contact page
