

In this month's Hydrafile:

Featured Product Range - Hyspecs is New Zealand's largest stockist of Eaton / Vickers hydraulic product...

Hydraulic Seminar Auckland and Christchurch - Due to popular demand our stage one hydraulic seminar will be going ahead in October and November...

Featured Product Range

Hyspecs has a long history with Eaton / Vickers going right back to when we first formed over 30 years ago. Most people don't know it but Wynn Cranston, Hyspecs founder also setup up Vickers NZ. Since then Hyspecs has never stopped supporting the Eaton / Vickers range of hydraulic products.

We now carry over \$1.25 million worth of Eaton / Vickers stock. It is highly likely that we will have the part in stock when you need it. This is in line with our philosophy of "Making It Easy For The Customer". We currently stock the following product:

Eaton Range

- * Char-Lynn: All Motors, Power Steering
- * Light, Medium and Heavy Duty Hydrostatic Transmissions (Closed Loop)
- * Light Transaxles
- * Medium Duty Variable Displacement Piston Pumps and Motors
- * Medium Duty Fixed Displacement Piston Motors
- * Flow Dividers, Flow Controls, Selector Valves
- * Spare parts and seal kits for all of the above

Vickers Range

- * Vane Pumps and Motors
- * Cetop Solenoid Valves
- * Power Steering Pumps
- * Spare parts and seal kits for all of the above

For more information on our Eaton / Vickers product range download our 2006 pricelist by [clicking here](#). Contact one of our sales engineers to talk about your requirements. Our phone numbers and email are listed in the left hand column.

Hydraulic Seminar

Hyspecs Auckland and Christchurch will be holding Stage One Hydraulic Seminars on the 12th/13th of October and the 9th/10th of November respectively. Download the registration form [here](#).

This two-day seminar offers you an introduction into hydraulic components and their operation. Subject matter covers generic types of pumps, motors and valves and the course content will provide you with an understanding on how these components operate, are applied and conditions that may lead them to fail.

The information presented in the seminar is combined and used in a winch circuit design that is carried out with parameters provided by participants. This allows you to see an example of basic circuit design and component combinations.

Basic faultfinding is also covered to assist you with the emotions of lost money, time and production involved with on-site problem solving. Looking at problem solving from another angle can help you reduce your customer's downtime.

All topics are presented in an open forum and we welcome you to ask questions and participate in topic discussions. This provides the opportunity to hear and share real life experiences that relate to the topic being discussed.

The cost of the two day course is \$450 + GST and this includes all course material, lunch and refreshments for both days.

To register for the course please download the form [here](#). Print this off and fax/post back to us as soon as possible. Alternatively just give us a call or [send us an email](#)...our phone numbers are listed in the left hand column. Attendee numbers are limited so places are allocated on a first come first serve basis.

Kind regards

Nick Cottier

Marketing & IT Manager
