

In this month's Hydrafile:

Products of interest:

Hydraforce releases a new range of 5-way solenoid cartridge valves ... The SV10-57 (and soon to be released 08 sized cartridge) features a 5 port design including an integral load sensing port. The SV10-57 has a working pressure of 247 bar and a flow rate of 20 lpm.

Information for new cartridge can be obtained from the following green link - [SV10-57 5-Port Solenoid Cartridge](#)

As always, please do not hesitate to contact our sales team if you require further information on this product. Just call one of the team or click on the following blue link to send an email - [Hyspecs Information](#)

Featured Product Range:

Hyspecs has been appointed the New Zealand Sole Distributor for Comer SOM planetary reduction boxes. This new product range in the Hyspecs line fits in perfectly with the existing lines. Hyspecs can offer a complete power drive solution to suit your application requirements. With the modular assembly design, multiple input, output and reduction ratio options can be selected to fit in with your requirements.

PG planetary gear units are divided into 21 basic groups depending on the different torques that are to be transmitted to the output shaft, which can vary from 0.05 to 65 kNm.

In fact, the product modular construction permits the coupling of bevel gears, worm gears, hydraulic brakes and a variety of input shafts to the planetary units, as well as providing for a wide choice of coupling flanges for hydraulic or electric motors.

Hyspecs currently stock a range of PG and PGA 100 to 700 series reduction boxes in both the Auckland and Christchurch locations for immediate dispatch.

For detailed specification information, click on the following green link to access the Comer SOM website data pages - [Comer SOM website data link](#)

Subscriber feedback:

Congratulations to last months grand prize winner ... Peter Thomas from Auckland is going to have no problems with his up and coming mid winter BBQ using his new pair of Hyspecs Super-Tongs - well done mate! Thank you to all of those that took the time to send in your emails - your suggestions and comments are greatly appreciated. Just because the tongs are gone it doesn't mean the suggestions have to stop - keep them rolling in.

Don't forget contacting us is easy:

1. Click anywhere you see [Hyspecs Information](#) and your email program will open ready to go.
2. Call one of our Sales Engineers on the numbers listed above
3. Click on our website address listed above and go to our contact page
