

In this month's Hydrafile:**New Product - ASA Suction Units**

Hyspecs is now an agent for the **asa** (asahydraulik) suction unit. The **asa** suction unit has been developed to provide a compact unit in hydraulic systems. The **asa** butterfly flange with SAE and DIN connections allows the combination with an elastic element (rubber compensator) to make a short compensating and economical connection with the pump port. The suction unit is screwed to the adaptor flange, which is welded to the tank. [Click here to enlarge the schematic.](#)

Due to low installation costs and a compact design, the suction units are a cost effective solution. A switch (mechanical or inductive) can be mounted on the standard block for monitoring the position of the lever.

Hyspecs has used this valve on one of its power packs. [Click here to enlarge the image.](#) For specification information on the ASA suction unit [click here.](#)

For more information and pricing please call Craig at Hyspecs on +64 9 274 9985 or email him directly craig@hyspecs.co.nz

**Featured Product - Kar-Tech Mini Remote**

...in a mini package.

Packs a **BIG** punch...

This month we take a look at one of the products from the Kar-Tech range of radio remote controls, the "Mini Remote".

How It Works: The "Mini" remote control transmitter runs from 2 AAA-cell batteries for long battery life. It has the capability to control 8 separate on/off outputs with its 9-button membrane keypad style control surface. The "Mini" remote control RF link uses 900 MHz spread-spectrum technology to provide a reliable radio control.

HYDRAULIC SPECIALTIES LTD.

P.O. Box 58-655 Greenmount, Auckland
Tel: +64 9 274-9985
Fax: +64 9 274-4441
9 Lady Ruby Drive, East Tamaki
Auckland, New Zealand

Web Site: www.hyspecs.co.nz
E-mail: hyspecs@hyspecs.co.nz

P.O. Box 7493 Sydenham, Christchurch
Tel: +64 3 366-1872
Fax: +64 3 366-1431
40 Durham Street, Sydenham
Christchurch, New Zealand

Why Use It?: The "Mini" remote control system allows powerful output control from an extremely small wireless control, 1.8" x 3.7". With its fairly long range (200-300 feet), control of a product can be maintained from a safe distance. The "Mini" remote control system provides a simple, easy to use wireless solution.

Typical Applications: The "Mini" remote control system can be used anywhere a wireless "on/off" control system is needed. The "Mini" remote control system can turn on loads up to 2.5A including most inductive loads like hydraulic coils. The "Mini" transmitter is small enough to fit almost anywhere, including the palm of your hand.

For more information download the [Mini Remote brochure here](#). To see the full range of radio remote controls available [download the brochure here](#).

To see how the remotes can help control your application [email us](#) or call Hyspecs today by using the contact details in the left hand column of this Hydrfile.

Staff News

Hyspecs Auckland welcomes back Kim Estreich to our Office Assistant position. Kim comes back to us after 3 years and you may recognise her voice when you call Hyspecs Auckland.

We have a new Sales Engineer, Guiomar Fernandez. Guiomar holds a degree in Mechanical Engineering and comes from a strong technical background in the Pneumatics industry, working for SMC in Europe for many years before emigrating with her Kiwi husband to NZ. Guiomar originally hails from Spain and will be looking after the Taranaki and Wanganui areas.

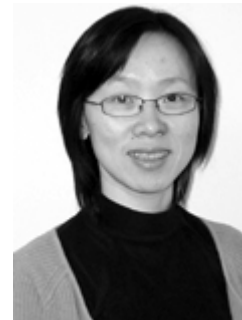

Ling Xie replaces Rachel Skiffington in our Auckland office as Branch Accountant. Ling holds a diploma in Business Accounting and has almost completed her Accounting Technician qualification at MIT.
