

In this month's Hydrafile:**Hydraulic Training Seminar - Auckland**

The next Hydraulic Training Seminar has been scheduled in Auckland for the 8th and 9th of October. It will be held in our specially designed seminar room at our Auckland branch, 32 Crooks Road, East Tamaki.

Book your spot on the course by downloading and filling out the registration form [here](#).

This two-day seminar offers you an introduction into hydraulic components and their operation. Subject matter covers generic types of pumps, motors and valves and the course content will provide you with an understanding on how these components operate, are applied and conditions that may lead them to fail.

The information presented in the seminar is combined and used in a winch circuit design that is carried out with parameters provided by participants. This allows you to see an example of basic circuit design and component combinations.

Basic fault-finding is also covered to assist you with the emotions of lost money, time and production involved with on-site problem solving. Looking at problem solving from another angle can help you reduce your customer's downtime.

All topics are presented in an open forum and we welcome you to ask questions and participate in topic discussions. This provides the opportunity to hear and share real life experiences that relate to the topic being discussed. For more information on the course content [download the Programme from here](#).

The cost of the two day course is \$500 + GST and this includes all course material, lunch and refreshments for both days.

To register for the course please [download the form here](#). Print this off and fax/post back to us as soon as possible. Alternatively just give us a call using the numbers in the left hand column or email us by [clicking here](#). Attendee numbers are limited so places are allocated on a first come first serve basis.

Aeroquip Hose and Fittings

Hyspecs now stocks the Eaton Aeroquip Matchmate range of hose and TTC/TTC12 hose tails. We also have selected Eaton adapters in stock. Using Aeroquip workshop hose presses we can offer high quality hose assemblies and OEM kits manufactured at our premises in Auckland and Christchurch. Pressure testing and certification of hose assemblies can be done on request.

Download Aeroquip catalogues from the Eaton website directly, by [clicking here](#).

For more information call one of our sales engineers today, [drop us an email](#) or visit our online shop by [clicking here](#).
