

In this month's Hydrafile:**CourierPost Email Alerts - Track your parcels**

Hyspecs recently changed to CourierPost for the majority of its courier parcels. This has given us the ability to better track and trace customer's parcels. We can now offer customers a free email alert with every parcel that leaves the door. The email contains information regarding the order (usually your purchase order number) and a one click link to the CourierPost website with detailed information on where your parcel is currently in transit.

To make it easier to track your parcels on the go, CourierPost have recently released a free iPhone App. [Click here](#) for more information.

If you'd like to receive these alerts please [email me](#) with the email address you would like the alerts sent to and we will get it setup to work straight away.

[Click here](#) to have CourierPost email alerts sent to you.

**Product Update - Emmegi KBV Air/Oil Cooler**

Emmegi coolers are a quality product that have served customers oil cooling requirements for many years. A few years back Emmegi released a cooler with an in-built bypass check valve. This greatly reduced the risk of over pressurising the cooler saving on expensive mistakes. The by-pass required an extra hose to be plumbed into the line, making hose companies happy but not so the customer.

The latest release from Emmegi, the KBV cooler does away with the need for the extra hose as the bypassing is achieved internally. The latest design does the same job but at a better overall price.

Download the Emmegi KBV cooler specification brochure [here](#). For more information or to purchase one of these coolers please talk with one of our sales engineers using the contact details here or drop us an email.

**New Product Range - Stauff Metric Tube Fittings**

The Hyspecs Christchurch branch now stock the Stauff line of Metric Tube Fittings. We can offer a complete fluid connector range with the highest quality of DIN 2353 metric cutting ring fittings for fluid power systems. The proven tube couplings according to DIN/ISO are suitable for most hydraulics applications.

Download the Metric Tube Fittings pricelist from our website by [clicking here](#). If you wish to have a free hardcopy sent out please [email me](#) with your address details.

100,000th Customer Giveaway

After a three month countdown we've finally made it - 100,000 packingslips in Auckland! The winning packingslip was for a \$12 dollar Eaton gasket seal. Not a bad investment for \$700 worth of fishing gear. The lucky winner was Keith Chestnut of Boart Longyear. It seems fate had an acting role in his win as he had just bought himself a new fishing boat weeks before.

Hyspecs wishes Keith good luck with the new fishing gear. Feel free to drop off a smoked Snapper on your way through next time Keith!

Warm regards

Nick Cottier
Marketing & IT Manager
